

Flying to the Moon and Further – Belgium Embraces the Challenge

Switch to Space 5

Eric Lardinois – CEO

18 November 2026

SPACEBEL CONTRIBUTES TO

a safe and sustainable planet and **inspiring space exploration**

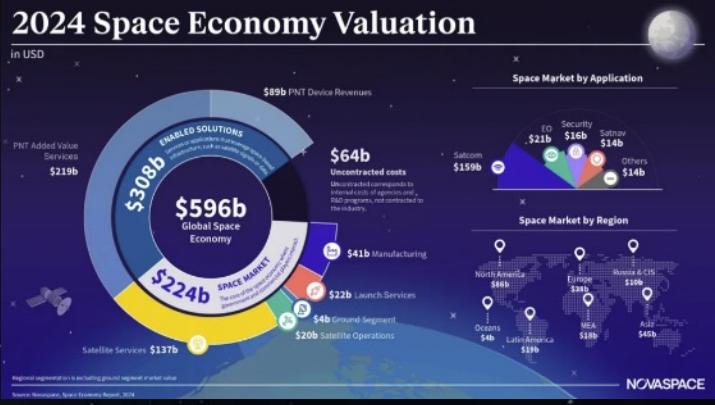

by engineering solutions for the global space ecosystem.

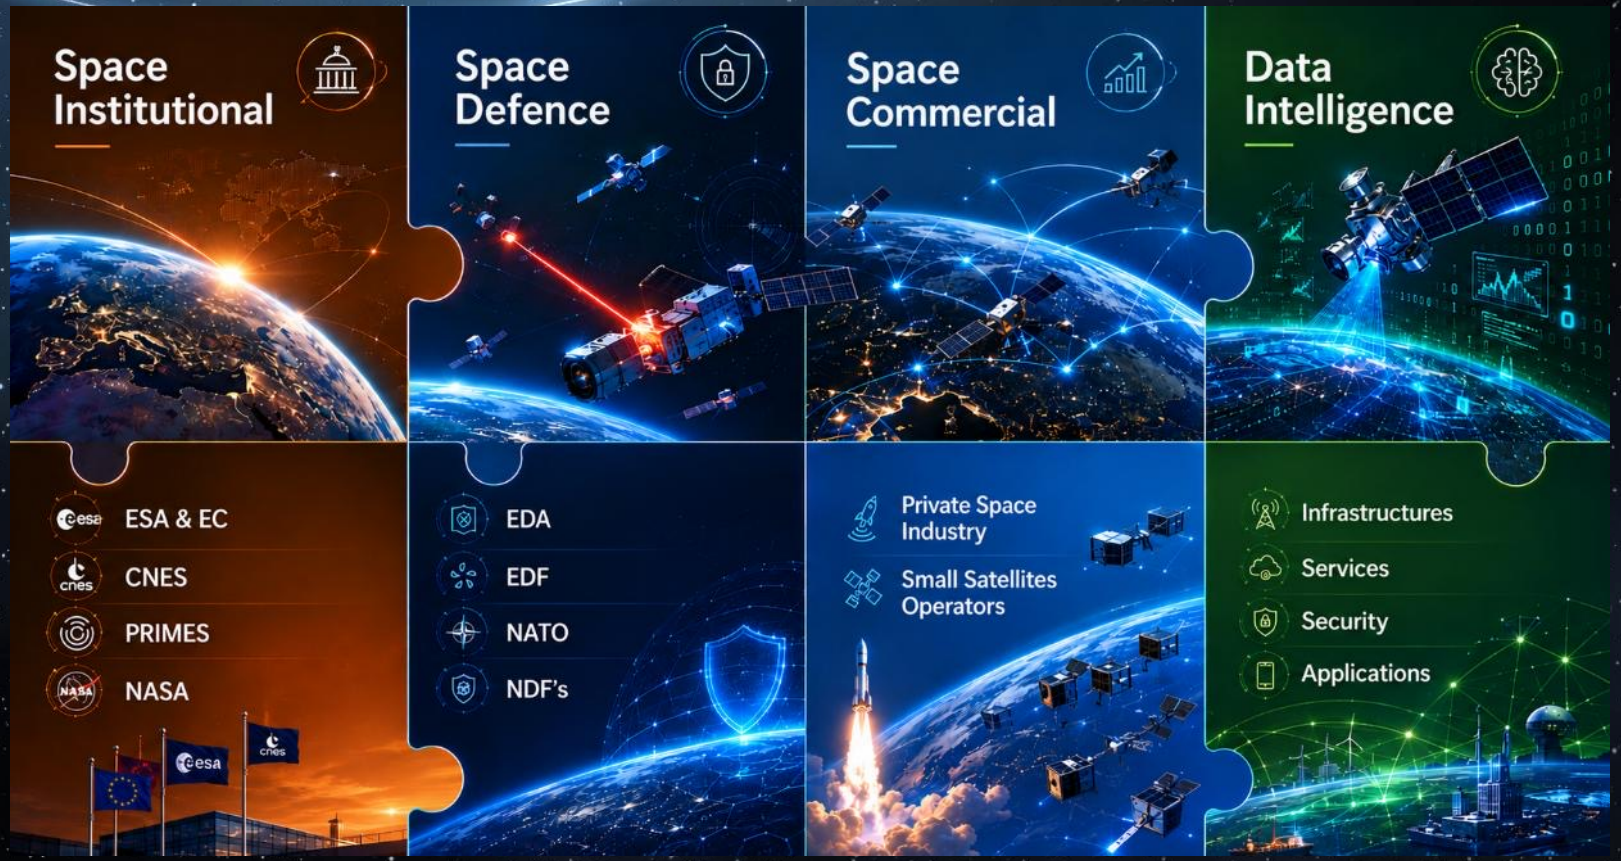

Our Value Chain

Architecture → Design → Development → Integration → Validation → Maintenance

SPACEBEL is structuring itself to embrace the expected growth of the global space economy and address a plurality of segments and programmes.

ARGONAUT aims to develop Europe's first autonomous lunar lander

CARGO – INSTRUMENTS – INFRASTRUCTURE ON THE MOON

Spacebel is already on board

ESA's **EnVision** mission will explore Venus to uncover its geological history, activity and why it evolved so differently from Earth.
